## Welcome to 2020DC

We are a network of consultants, working together from around the world to enhance development through market based strategies. Each consultant brings a unique set of skills to the group, skills that allow us to build unique strategies and solutions for companies, NGOs and government agencies alike.

We work with both the private and public sectors, offering consulting services for a broad range of products. We work mostly with companies, agencies, and individuals looking to increase their global marketing presence, improve development efforts in impoverished areas, or find the correct market for their products.

We offer training, strategy, marketing, and access to a global network of consultants and affiliates, all ready and able to match your effort to grow your business or improve the lives of others.
